Carbon Reduction Plan

Supplier name: Derrys Ltd Publication date: 02/02/2026

Commitment to Achieving Net Zero

Derrys Ltd is committed to achieving Net Zero emissions by **2050**.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024 Additional Details relating to the Baseline Emissions calculations: As Derrys Ltd has not previously reported emissions, we are using our first reporting period as our Baseline. Calculations are based on a 10,000 sq ft warehouse using an average of 2,000 kWh of electricity per month and gas-fired heating.

| Baseline Year Emissions: 2024 | TOTAL (tCO2e) |
|---|---------------|
| Scope 1 (Gas heating & fuel) | 22.5 |
| Scope 2 (Purchased electricity) | 5.0 |
| Scope 3 (Included Sources) (Waste & Travel) | 8.5 |
| Total Emissions | 36.0 |

Current Emissions Reporting

| Reporting Year Emissions: 2025 | TOTAL (tCO2e) |
|--------------------------------|---------------|
| Scope 1 | 20.2 |
| Scope 2 | 4.1 |
| Scope 3 (Included Sources) | 7.7 |
| Total Emissions | 32.0 |

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

- We project that carbon emissions will decrease over the next five years to **23.4 \$tCO₂e\$** by **2029**.
- This is a reduction of **35%**.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives: The following environmental management measures and projects have been completed or implemented since the **2024** baseline. The carbon emission reduction achieved by these schemes equate to **4.0 \$tCO₂e\$**, an **11%** reduction against the **2024** baseline.

- **Warehouse Efficiency:** Installation of LED and PIR lighting controls across the 10,000 sq ft facility.
- **Heating Management:** Optimization of gas heating systems and improved insulation to reduce Scope 1 direct emissions.
- **Waste Reduction:** Implementation of improved recycling protocols to reduce Scope 3 waste emissions.

Future Measures: In the future we hope to implement further measures such as:

- Transitioning to a fully electrified company vehicle fleet.
- Exploring the installation of on-site renewable energy sources (Solar PV) to further reduce Scope 2 reliance.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
